

## *Summer 2017 Newsletter*

**Annual Physical Exams are recommended for people of all ages; the same holds true for your animals, and 1 of the many reasons they are considered family as most pet owners strive to provide care for their loved ones. But, unless you have medical insurance it can be challenging to juggle extra expenses for more than routine check-ups not to mention time to get your concerns addressed.**

**Did you know that an Exam, Vaccinations, fecal and heartworm screening tests and a typical 6 month supply of preventive medication for flea, tick and heartworm will average about \$400?**

**Our hospital offers Preventive Care Plans that will cover not just Annual Exams, Vaccines, Parasite Screening and a 12 MONTH Supply of Preventive Flea, Tick and Heartworm medications. It also covers unlimited office visits (excluding urgent care/hospitalization visits) for unforeseen circumstances like, skin, ear, eye problems, foxtails, animal scuffles, gastrointestinal issues, changes in behavior/activity and more.**

**Having a Preventative Care Plan is a peace of mind in knowing your pet will be seen by a Veterinarian and your won't have to pay for each Exam fee each time an unfortunate incident arises.**

**We have several options to choose from and there are payment plan options for each package.**

**We know how important your pets are in your life and we are grateful for the opportunity to help assist you in their care.**

**Call to find out how you can get your pets started; and if you come in for a visit and still haven't decided, you have 1 week from your visit date to sign up for a plan that fits you and your pets needs and you can apply that last week visit toward payment of a Preventative Care Plan. See the brochure to get more information on cost and coverage. We hope you have a safe and happy summer!**
